

To Our Members of Congress:

President Trump has shown ignorance of nuclear weapons and has stated a readiness to use them. Should he decide to start a nuclear war, **there are no legal safeguards to stop him.** The consequence would not be a failed hotel or bankrupt casino — but nuclear war.

We urgently request that you support the “Restricting First Use of Nuclear Weapons Act of 2017” introduced in January 2017 by Senator Ed Markey and Congressman Ted Lieu to restrict the President from using the Armed Forces to conduct a first-use nuclear strike without a congressional declaration of war authorizing such a strike.
